INTRODUCTION

The official vital statistics of Canada are published by the Dominion Bureau of Statistics in two main annual reports, *Vital Statistics* (Catalogue Nos. 84-201 and 84-202) which commenced in 1921. Two publications, *Causes of Death, Canada, 1950-60,* (Catalogue No. 84-514) and *Causes of Death, Canada, 1958-64,* (Catalogue No. 84-519), copies of which are still available, supplemented the Annual Reports for the period 1950-64 by presenting more detailed information on causes of death each year. Whereas the Annual Reports for these years contain data on deaths according to the International Intermediate List ("A") of 150 causes, the above two compilations provided a finer breakdown of figures according to the three-digit categories and four-digit subcategories of the *International Statistical Classification of Diseases, Injuries and Causes of Death,* Sixth Revision, 1948 and Seventh Revision, 1955, which were put into effect in 1950 and 1958 respectively.

This publication expands the two previous publications into a regular annual series entitled *Causes of Death,* showing the current year's deaths by the three-digit categories and four-digit subcategories, by sex for the provinces, and by sex and five-year age groups for Canada. The present publication does not list all categories of the International Classification since some categories for which there were no deaths in 1965 have been excluded. Furthermore, the full category titles of the International Classification have been shortened in some cases for convenience of publication.

For the convenience of users desiring to calculate rates, estimated mid-year populations for the provinces by sex and for Canada by sex and age group are given below. These are subject to revision following the 1966 Census.

INTRODUCTION

The official vital statistics of Canada are published by the Dominion Bureau of Statistics in two main annual reports, *Vital Statistics* (Catalogue Nos. 84-201 and 84-202) which commenced in 1921. Two publications, *Causes of Death, Canada, 1950-60*, (Catalogue No. 84-514) and *Causes of Death, Canada, 1958-64*, (Catalogue No. 84-519), copies of which are still available, supplemented the Annual Reports for the period 1950-64 by presenting more detailed information on causes of death each year. Whereas the Annual Reports for these years contain data on deaths according to the International Intermediate List A of 150 causes, the above two compilations provided a finer breakdown of figures according to the three-digit categories and four-digit subcategories of the *International Statistical Classification of Diseases, Injuries and Causes of Death*, Sixth Revision, 1948 and Seventh Revision, 1955, which were put into effect in 1950 and 1958, respectively.

This is the second publication expanding the two previous publications into a regular annual series entitled *Causes of Death*, showing the current year's deaths by the three-digit categories and four-digit subcategories, by sex for the provinces, and by sex and five-year age groups for Canada. The present publication does not list all categories of the International Classification since some categories for which there were no deaths in 1966 have been excluded. Furthermore, the full category titles of the International Classification have been shortened in some cases for convenience of publication.

For the convenience of users desiring to calculate rates, the June 1 Census populations for the provinces by sex and for Canada by sex and age group are given below.

INTRODUCTION

The official vital statistics of Canada are published by the Dominion Bureau of Statistics in two main annual reports, *Vital Statistics* (Catalogue Nos. 84-201 and 84-202) which commenced in 1921. Two publications, *Causes of Death, Canada, 1950-60,* (Catalogue No. 84-514) and *Causes of Death, Canada, 1958-64,* (Catalogue No. 84-519), copies of which are still available, supplemented the Annual Reports for the period 1950-64 by presenting more detailed information on causes of death each year. Whereas the Annual Reports for these years contain data on deaths according to the International Intermediate List A of 150 causes, the above two compilations provided a finer breakdown of figures according to the three-digit categories and four-digit subcategories of the *International Statistical Classification of Diseases, Injuries and Causes of Death,* Sixth Revision, 1948 and Seventh Revision, 1955, which were put into effect in 1950 and 1958, respectively.

This is the third publication expanding the two previous publications into a regular annual series entitled *Causes of Death,* showing the current year's deaths by the three-digit categories and four-digit subcategories, by sex for the provinces, and by sex and five-year age groups for Canada. The present publication does not list all categories of the International Classification since some categories for which there were no deaths in 1967 have been excluded. Furthermore, the full category titles of the International Classification have been shortened in some cases for convenience of publication.

For the convenience of users desiring to calculate rates, estimated mid-year populations for the provinces by sex and for Canada by sex and age group are given below.

INTRODUCTION

The official mortality statistics of Canada are published in two main annual reports, *Vital Statistics*, (Catalogue Nos. 84-201 and 84-202). These publications contain tables on deaths, by cause of death, but classified according to the International "Intermediate" ("A") List of '150-cause groups'. In order to meet the need for more detailed data on causes of death two publications, *Causes of Death, Canada, 1950-60*, (Catalogue No. 84-514) and *Causes of Death, Canada, 1958-64*, (Catalogue No. 84-519) provided national totals of the numbers of deaths according to the (detailed) 3-digit categories and 4-digit subcategories of the 6th and 7th Revisions of the International Classification of Diseases which were put into effect in Canada in 1950 and 1958 respectively.

In order to meet the demand for more current and still further detailed data on causes of death, these publications were converted to a regular annual report beginning with 1965 data-year, and the report expanded to include the current years' deaths according to the 3- and 4-digit categories of the International Classification, by sex and province of residence of the decedent, and by sex and 5-year age group for Canada. This, therefore represents the 4th such report in this expanded series.

The present report is identical to previous editions except for some revision in format in that, for reasons of economy and in order to accelerate release of the data, the original computer print-outs of this data have been reproduced by direct photo-offset rather than by the more expensive type-set process as formerly. Since these computer print-outs (Tables 15 and 15.1) contain only the category or rubric numbers of the International Classification of Diseases, a Key to the actual titles of each 3- and 4-digit rubric of the Classification has therefore been reproduced on pages 4-19 for the convenience of users. Further, the tables contain only the specific 4th- or 3rd-digit category number for which there was at least one death for either sex, whereas the Key (pages 4-19) lists most—but not all—categories of the Int'l Classification. In addition it will be noted that the tables list first the specific 4th-digit subcategory (ies) where applicable, followed by the appropriate 3-digit category total.

For the convenience of users desiring to calculate rates, estimated mid-year population by sex for each province, and by sex and age-group for Canada, are given below.

	EXVII. Accidents, poisonings, and violence (Classification according to external cause).
	Railway accidents (E800 - E802)
E800	– involving railroad employee
E801	– involving passenger
E802	– involving other and unspecified person
	Motor vehicle traffic accidents (E810-E825).
E810	– involving collision with railway train
E811	– involving collision with street car
E812	– to pedestrian
E813	– to pedal cyclist
E814	– to rider or passenger of motorcycle, in collision with non-motor vehicle or object.
E815	– to rider or passenger of motorcycle, in collision with other motor vehicle.
E816	Other, – involving two or more motor vehicles.
E817	– to occupant of motor vehicle in collision with pedestrian or pedal cycle.
E818	– involving collision with animal or animal-drawn vehicle.
E819	– involving collision with fixed or unspecified object.
E820	– while boarding and alighting
E821	– to rider of motorcycle without antecedent collision.
E822	– involving overturning in roadway
E823	– involving running off roadway
E824	Other noncollision motor vehicle traffic accident.
E825	Motor vehicle traffic accident of unspecified nature.
	Motor vehicle nontraffic accidents (E830-E835).
E830	– to pedestrian
E831	– to pedal cyclist
E832	– to rider or passenger of motorcycle
E833	Other, – involving two or more motor vehicles.
E834	– while boarding and alighting
E835	– other and unspecified nature
	Other road vehicle accidents (E840 - E845)
E840	Street car accident to pedestrian
E841	Other street car accident, except collision with motor vehicle.
E842	Accident to pedestrian caused by pedal cycle.
	Other road vehicle accidents – Concluded:
E843	Accident to rider of pedal cycle not involving collision with motor vehicle.
E844	Accident to pedestrian caused by other non-motor road vehicle.
E845	Other non-motor road vehicle accidents
	Water transport accidents (E850-E858)
E850	Submersion of occupant of small boat
E851	Other water transport injury by submersion
E852	Fall on stairs and ladders in water transport.
E853	Other falls from one level to another in water transport.
E854	Falls on same level in water transport
E855	Unspecified falls in water transport
E856	Machinery accident in water transport
E857	Other specified accidents in water transport.
E858	Water transport accident of unspecified cause.
	Aircraft accidents (E860-E866)
E860	Accident to personnel in military aircraft
E861	Injury to occupant by accident to commercial "transport" aircraft.
E862	Other injury in commercial "transport" aircraft.
E863	Injury to occupant by accident to other specified aircraft.
E864	Aircraft accident at airfield to person not in aircraft.
E865	Aircraft accident elsewhere to person not in aircraft.
E866	Other and unspecified aircraft accidents
	Accidental poisoning by solid and liquid substances (E870-E888).
E870	– by morphine and other opium derivatives
E871	– by barbituric acid and derivatives
E872	– by aspirin and salicylates
E873	– by bromides
E874	– by other analgesic and soporific drugs
E875	– by sulphonamides
E876	– by strychnine
E878	– by other and unspecified drugs
E879	– by noxious foodstuffs
E880	– by alcohol
E881	– by petroleum products
	Accidental poisoning by solid and liquid substances – Concluded:
E882	– by industrial solvents
E883	– by corrosive aromatics, acids, and caustic alkalis.
E884	– by mercury and its compounds
E885	– by lead and its compounds
E886	– by arsenic and antimony, and their compounds.
E887	– by fluorides
E888	– by other and unspecified solid and liquid substances.
	Accidental poisoning by gases and vapours (E890 - E895).
E890	– by utility (illuminating) gas
E891	– by motor vehicle exhaust gas
E892	– by other carbon monoxide gas
E893	– by cyanide gas
E894	– by other specified gases and vapours
E895	– by unspecified gases and vapours
	Accidental falls (E900 - E904)
E900	Fall on stairs
E901	Fall from ladders
E902	Other falls from one level to another
E903	Fall on same level
E904	Unspecified falls
	Other accidents (E910 - E936)
E910	Blow from falling or projected object or missile.
E911	Accident caused by vehicle
E912	Accident caused by machinery
E913	Accident caused by cutting and piercing instruments.
E914	Accident caused by electric current
E915	Accident caused by explosion of pressure vessel.
E916	Accident caused by fire and explosion of combustible material.
E917	Accident caused by hot substance, corrosive liquid, and steam.
E918	Accident caused by radiation
E919	Accident caused by firearm
E920	Foreign body entering eye and adnexa
E921	Inhalation and ingestion of food causing obstruction or suffocation.
E922	Inhalation and ingestion of other object causing obstruction or suffocation.

E924	Accidental mechanical suffocation in bed and cradle.
E925	Accidental mechanical suffocation in other and unspecified circumstances.
E926	Lack of care of infants under 1 year of age.
E927	Accidents caused by bites and stings of venomous animals and insects.
E928	Other accidents caused by animals
E929	Accidental drowning
E930	High and low air pressure
E931	Excessive heat and insolation
E932	Excessive cold
E933	Hunger, thirst, and exposure
E934	Cataclysm
E935	Lightning
E936	Other and unspecified accidents
	Complications due to nontherapeutic medical and surgical procedures (E940-E946).
E940	Generalized vaccinia following vaccination.
E941	Postvaccinal encephalitis
E942	Other complications of smallpox vaccination.
E944	Other complications of prophylactic inoculation.
E945	Complications of anaesthesia for nontherapeutic purpose.
E946	Other complications due to nontherapeutic medical and surgical procedures.
	Therapeutic misadventure and late complications of therapeutic procedures (E950-E959).
E950	Therapeutic misadventure in surgical treatment.
E951	Therapeutic misadventure in infusion or transfusion.
E953	Therapeutic misadventure in administration of drugs or biologicals.
E954	Therapeutic misadventure in anaesthesia
E955	Other and unspecified therapeutic misadventure.
	Late effects of injury and poisoning (E960-E965).
E960	Late effect of motor vehicle accident
E961	Late effect of accidental poisoning
E962	Late effect of other accidental injury
E963	Late effect of self-inflicted injury
E964	Late effect of injury purposely inflicted by another person (not in war).
E965	Late effects of injuries due to war operations.

Int'l list No.	Cause of death
	Suicide (E970-E979)
E970	– poisoning by analgesic and soporific substances.
E971	– poisoning by other solid and liquid substances.
E972	– poisoning by gases in domestic use
E973	– poisoning by other gases
E974	– by hanging and strangulation
E975	– by submersion (drowning)
E976	– by firearms and explosives
E977	– by cutting and piercing instruments
E978	– by jumping from high place
E979	– by other and unspecified means
	Homicide and injury purposely inflicted by other persons (not in war) (E980-E985).
E980	Nonaccidental poisoning by another person.
E981	Assault by firearm and explosive
E982	Assault by cutting and piercing instruments.
E983	Assault by other means
E984	Injury by intervention of police
E985	Execution
	Injury resulting from operations of war (E990-E999).

INTRODUCTION

The official mortality statistics of Canada are published in two main annual reports, Vital Statistics, (Catalogue Nos. 84-201 and 84-202). These publications contain tables on deaths, by cause of death, but classified according to the International "Intermediate" ("A") List of '150-cause groups'. In order to meet the need for more detailed data on causes of death two publications, Causes of Death, Canada, 1950-60, (Catalogue No. 84-514) and Causes of Death, Canada, 1958-64, (Catalogue No. 84-519) provided national totals of the numbers of deaths according to the (detailed) 3-digit categories and 4-digit subcategories of the 6th and 7th Revisions of the International Classification of Diseases which were put into effect in Canada in 1950 and 1958 respectively.

In order to meet the demand for more current and still further detailed data on causes of death, these publications were converted to a regular annual report beginning with 1965 data-year, and the report expanded to include the current years' deaths according to the 3- and 4-digit categories of the International Classification, by sex and province of residence of the decedent, and by sex and 5-year age group for Canada. The present report, the 5th such report in this expanded series, is based on the 8th Revision of the International Classification of Diseases as adapted for use in the United States (ICDA), which was put into effect in Canada in 1969.

Except for conversion to the new Classification and the resulting changes in diagnostic categories, the present edition is identical to previous editions in so far as content is concerned. However, there are several major changes in format, from previous editions: (1) Tables have been reproduced by direct photo-offset from new formats of computer outputs; (2) Bilingual titles for each disease category have been included for the first time, in addition to the ICDA category numbers; (3) Because of space limitations the disease categories have, however, been arbitrarily condensed, where necessary; reference should, therefore, be made to the ICDA manual for the full category title and content, if necessary; (4) As in previous editions the 3- or 4-digit categories for which there were no deaths in the current year have been excluded; (5) Contrary to past practice, totals are given for each 3-digit category, where applicable, followed by the 4th digit sub-category(ies), where applicable.

The reader is cautioned that since there was considerable restructuring of the 8th Revision of the International Classification (ICDA), a direct comparision of categories with previous Revisions, either by category

Les statistiques des décès au Canada sont publiées dans deux rapports principaux, Statistiques de l'État Civil (Catalogues N° 84-201 et N° 84-202). Ces rapports contiennent des tableaux sur les décès, par cause de décès, suivant la Classification Internationale "Intermédiaire" (A) en 150 groupes de causes. Afin de répondre aux besoins de données détaillées sur les causes de décès, deux publications, Causes de décès, Canada 1950-60 (Catalogue N° 84-514) et Causes de décès, Canada, 1958-64 (Catalogue N° 84-519) contiennent des tableaux, à l'échelle nationale, des nombres de décès selon les rubriques à 3 chiffres et les sous-rubriques à 4 chiffres des 6e et 7e Révisions de la Classification Internationales des Maladies. Ces révisions sont entrées en application au Canada en 1950 et 1958 respectivement.

Afin de répondre à la demande de statistiques à la fois récentes et plus détaillées sur les causes de décès, ces rapports sont publiées annuellement depuis 1965. Ont été ajoutés en supplément, les décès selon les rubriques à 3 ou 4 chiffres de la Classification Internationale par sexe et par province de résidence du décédé ainsi que par sexe et par groupes quinquennaux d'âges pour le Canada. Le présent rapport, le 5e de cette nouvelle série, est basé sur la 8e Révision de la Classification Internationale des Maladies adaptée (CIMA), en usage aux États Unis, et qui est appliquée au Canada depuis 1969.

A l'exception des changements dans les catégories de diagnotics, la présente édition est identique aux précédentes quant au contenu. Il faut, toutefois, relever certains changements importants: (1) les tableaux sont reproduits par impression offset directe à partir des nouvelles sorties d'imprimante de l'ordinateur; (2) des titres bilingues ont été ajoutés aux chiffres des rubriques de maladies; (3) en raison des limitations d'espace certaines rubriques ont été arbitrairement groupées et l'utilisateur est prié, par conséquent, de se référer au manuel de la CIMA pour le contenu détaillé de ces rubriques; (4) comme dans les éditions précédentes, les rubriques à 3 ou 4 chiffres pour lesquelles il n'y a pas eu de décès ont été omises; (5) mais contrairement aux éditions précédentes, et s'il y a lieu, les totaux pour les rubriques sont donnés.

En raison de la restructuration importante des maladies dans la 8e Révision (CIMA), le lecteur est prié de na pas procéder à des comparaisons directes des rubriques avec les révisions précédentes,

number of disease title cannot, in all cases, be made without reference to the previous Classification(s).

For the convenience of users desiring to calculate rates, the 1969 estimated mid-year populations by sex, for each province, and by sex and age-group for Canada, are given below.

que ce soit par chiffre de rubrique ou par appellation de maladie, sans référer à ces classifications.

Une estimation de la population moyenne par sexe et par province ainsi que par sexe et par groupes d'âges de 5 ans pour le Canada a été ajoutée en vue de permettre aux utilisateurs qui le désirent de calculer des taux de mortalité.

INTRODUCTION

The official mortality statistics of Canada are published in two main annual reports, Vital Statistics, (Catalogue Nos. 84-201 and 84-202). These publications contain tables on deaths, by cause of death, but classified according to the International "Intermediate" ("A") List of '150-cause groups'. In order to meet the need for more detailed data on causes of death two publications, Causes of Death, Canada, 1950-60. (Catalogue No. 84-514) and Causes of Death, Canada, 1958-64, (Catalogue No. 84-519) provided national totals of the numbers of deaths according to the (detailed) 3-digit categories and 4-digit subcategories of the 6th and 7th Revisions of the International Classification of Diseases which were put into effect in Canada in 1950 and 1958 respectively.

In order to meet the demand for more current and still further detailed data on causes of death, these publications were converted to a regular annual report beginning with 1965 data-year, and the report expanded to include the current years' deaths according to the 3- and 4-digit categories of the International Classification, by sex and province of residence of the decedent, and by sex and 5-year age group for Canada. The present report, the 6th such report in this expanded series, is based on the 8th Revision of the International Classification of Diseases as adapted for use in the United States (ICDA), which was put into effect in Canada in 1969.

The present edition is identical to the previous (1969) edition in both form and content. As indicated in the Introduction to the 1969 report, the reader is cautioned that (1) because of space limitations the titles of disease categories and sub-categories have been arbitrarily condensed, where necessary, from those appearing in the ICDA Manual; (2) as in previous editions the 3- and 4-digit categories for which there were no deaths in the current year have been excluded. The reader is further cautioned that since there was considerable restructuring of the 8th Revision of the International Classification (ICDA), a direct comparison of categories with previous Revisions, either by category number or disease title, cannot, in all cases, be made without reference to the previous Classification(s).

Les statistiques des décès au Canada sont publiées dans deux rapports principaux, Statistiques de l'État Civil (Catalogues N° 84-201 et N° 84-202). Ces rapports contiennent des tableaux sur les décès, par cause de décès, suivant la Classification Internationale "Intermédiaire" (A) en 150 groupes de causes. Afin de répondre aux besoins de données détaillées sur les causes de décès deux publications, Causes de décès, Canada 1950-60 (Catalogue N° 84-514) et Causes de décès, Canada 1958-64 (Catalogue N° 84-519) contiennent des tableaux, à l'échelle nationale, des nombres de décès selon les rubriques à 3 chiffres et les sous-rubriques à 4 chiffres des 6e et 7e Révisions de la Classification Internationale des Maladies. Ces révisions sont entrées en application au Canada en 1950 et 1958 respectivement.

Afin de répondre à la demande de statistiques à la fois récentes et plus détaillées sur les causes de décès, ces rapports sont publiés annuellement depuis 1965. Ont été ajoutés en supplément, les décès selon les rubriques à 3 ou 4 chiffres de la Classification Internationale par sexe et par province de résidence du décédé ainsi que par sexe et groupes quinquennaux d'âges pour le Canada. Le présent rapport, le 6e de cette nouvelle série, est basé sur la 8e Révision de la Classification Internationale des Maladies adaptée (CIMA), en usage aux États-Unis, et qui est appliquée au Canada depuis 1969.

La présente édition est identique à la précédente (1969) quant à la forme et au contenu. Comme il a été indiqué dans l'Introduction du rapport 1969, il est nécessaire d'avertir le lecteur (1) qu'en raison des limitations d'espace certaines rubriques et sous-rubriques de titres de maladies du Manuel de la CIMA ont été arbitrairement groupées; (2) comme dans les éditions précédentes, les rubriques à 3 ou 4 chiffres pour lesquelles il n'y a pas eu de décès ont été omises. A cause de la restructuration importante de la 8e Révision de la Classification Internationale (CIMA), le lecteur est prié de ne pas effectuer des comparaisons de rubriques avec les révisions antérieures, que ce soit par numéro de rubrique ou appellation de maladie, comparaisons qui ne peuvent être faites sans référence à la (aux) classification(s) antérieure(s).
